AMCC

News 08/02

Notice: Due to noise issues, Please do not arrive at the track on race days before 7.45am

New Club Chairman

As from mid January, Dave Skelton took over the roll of Club Chairman, and Robin Francis took up the position of Vice Chairman. Kevin Bissell has returned as Race Director and will continue to do all the files and behind the scenes jobs to do with race director, Nigel Moss (me) will only be Race Controller on race days (my choice).

BRCA Electric National

We are to hold the first round of this championship, this is now a 2-day event with up to 150 entries.

To run this event successfully, and to keep our club afloat, we will need as much help as possible on both days, so if you are available to help with the running on both or either day then let the new chairman - Dave Skelton know, and if you just happen to be free that weekend please turn up and help.

Car weight of TT-01 (as From Feb 1st 2008)

1560 Grams

A number of TT-01's were weighed at the meeting on 20th Jan 2008, and only 2 were found to be below the above mentioned weight. My own car with a 6cell NiMh pack still comes in at a hefty 1640g, where as another came in at 1530g, so car weights vary.

And for those interested, Rob Baxters TT-01 comes in at 1585g.

so as from Feb 1st 2008 all Tamiya TT-01 cars will be checked, and will need to be on or above the revised 1560g minimum weight limit.

Recent Personal Best Race Time Improvements

December 16th 2007 - Winter Series Round 6:

Chris Lilywhite	27T Stock Touring	13 / 311.11	23.93	0
